INSTRUCTIONS FOR OPENING MRI CD's

- 1.) Make sure ALL pop-up blockers are turned off.
 - a. Including add-on blockers like Google and Yahoo toolbars.
- 2.) Place the CD into computer drive slot.
- 3.) A window will pop up saying “press here to view the image using *eMed* Image CD Viewer.”
- 4.) Press the Underlined Text that says “*click here.*”
- 5.) Two more windows will pop up *IF* the pop-up blockers are turned off.
- 6.) The smaller of the two windows is the one that makes sure you have the correct controls to view the images. This window will also have a mini, flashing pop-up/drop down at the top if the computer does NOT have the correct software installed for viewing.
- 7.) Click the flashing drop down saying “*click here to install Active X control*”. Then click the *install* option.
- 8.) Another screen may pop up verifying the installation of the software—click ‘*install*’ on this screen as well.
- 9.) The small window will notify you that the software has been installed correctly and this window will automatically close on its own—usually around 5 seconds.
- 10.) Once all of this is completed: click on the underlined name of the patient next to the study you wish to view and the images should appear.
- 11.) If the preceding steps fail, sign onto the website and repeat steps 5 through 9; by doing so the CD should be readable.
